N° 1188 A.D. 1892

Date of Application, 21st Jan., 1892—Accepted, 27th Feb., 1892

COMPLETE SPECIFICATION.

A New or Improved Pocket Powder Box and Pad with Pin Cushion Combined.

I, JOHN FRANCIS FIELDSEND of No. 8 Southgate Place, New Southgate in the County of Middlesex, Chemist and Druggist, do hereby declare the nature of this invention and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement :—

My new and improved pocket powder box and pad is designed for the purpose of producing an effectual box and pad, (which pad entirely prevents any powder falling when in use, and is an improvement upon the ordinary powder puff constructed and employed for the same purpose) and also containing a mirror and pin cushion, being at the same time effective and simple in construction.

In realizing my idea I have designed a box or case of bone or any other suitable material containing a small pad constructed of velveteen or suitable material which is inserted or attached to the inside of the lid of the box or case. When the pad is required for use, all that is necessary is to unscrew the lid and apply the pad in the same way as the ordinary powder puff.

On the top of the lid is inserted a small mirror for the convenience of the persons using the same.

At the bottom of the box or case on the outside is attached a small pin cushion.

In order that my invention may be easily understood and readily carried into practice I will proceed to further describe the same with reference to the accompanying sheet of drawings.

DESCRIPTION OF DRAWINGS.

a. is a view of the velveteen pad inserted or attached to the inside of the lid of the box or case.

b. is the pin cushion attached to the bottom of the box or case.

c. is the mirror inserted in the top of the lid.

Having now particularly described and ascertained the nature of my said invention and in what manner the same is to be performed I declare that what I claim is :—

1. The construction of a new or improved pocket powder box and pad with pin cushion combined substantially as and for the purposes hereinbefore set forth.

2. I claim the arrangement and application of the velveteen pad substantially as and for the purposes hereinbefore set forth.

3. I claim the arrangement and application of the pin cushion substantially as and for the purpose hereinbefore described.

4. I claim the improved arrangement and combination of parts *a*, *b* and *c*, forming my new and improved pocket powder box and pad substantially as and for the purposes hereinbefore described and represented in the drawings hereunto annexed.

Dated this 21st day of January 1892.

JOHN FRANCIS FIELDSEND.
